

At St George's, children show a passion for science through a well-sequenced and challenging curriculum. Children are given opportunities to develop the characteristics of scientists and explore, discuss and question to deepen their understanding of the world around them.

There are opportunities for Science lessons to be taken outdoors.

Science teaching and learning is good at our school when:

Teachers make links across different curriculum subjects

Pupils learn new things through engaging and stimulating lessons using a range of evidence based learning strategies .

Pupils discuss and develop their ideas through science talk.

Pupils see themselves as a scientist.

Lessons build upon previous knowledge.

Science can be seen in the real world and in different careers.

Teachers plan opportunities to address my misconceptions.

Pupils share learning with our community and engage in wider school opportunities
