

Dear Parents, carers and pupils

At St. George's we are pleased to announce that we have been given **free full access** to the resources on the Busy Things educational online learning platform.

Once logged in, you can access learning activities appropriate for your child's year group. The site works best on a laptop, desktop or tablet.

Busy Things provide online activities and games for all subjects in the curriculum. Some are games that can be played online, others can be typed on and saved electronically and/or printed. The interactive worksheets give you feedback on your score and can be saved and printed.

For example, in one of the geography games you can label all the continents and oceans and check you are correct. There is a great history timeline to label too and of course, you can check your answers.

There are also lots of maths activities and ideas for reading and writing activities.

**Check out the assignments section in the toolbar on the right. Here you'll find activities that we'd like you to complete. You can submit them to us and we can see what you've been doing.**

For access from home all you need to do is visit:

[busythings.co.uk](http://busythings.co.uk)

login: home00090

password: pupil

We are really lucky to have been given this full access and I hope you put the resource to great use.

**Lower Junior Team – Mrs Hume, Mr Holmes , Mrs Goodman and Mrs Webb**
